

Quality Management Strategy (QMS)

The guiding principles of the project's QMS are openness, transparency, co-creation, initiative-taking of everyone and collaboration of all partners as well as shared leadership are the core principles of FOREST21.

On its part, Project's quality management process creates space for everyone to excel through everyone's active role, empowerment, and ownership. This extends to the role of students, who following the key principle of PBL, are given a sense of ownership of their personal learning process. The project activities are strongly linked to each other, each activity builds on the previous one and contributes to the next, following the cycle model of development.

Scope and Objective of the Deliverable

Quality Standard

Quality Planning

Visual Profile

Deliverables

Publications

Notice of Planned Publications

Dissemination/Marketing and Publications

Notification of Funding

Management and Internal Communication Tools

Quality Assurance

Interim Managemnet Reports

Finished, Ongoing and Planned Activities

Estimates of Efforts Per Quarter

Standardization of Documents and Deliverables

Numbering of Documents
